CTS Office365 Roadmap

We Are Here

Identity

- Implement ADFS for federation to cloud services
- Evaluate options for O365 tenant design
- Establish O365 shared tenant and implement AADSync for license activation
- Understand MS strategy for Azure Active Directory and delegated administration
- Establish Identity Management Initiative
- Establish Enterprise Active Directory governance and standards, develop strategy for extending identity to the cloud, develop solution for SAW integration
- Begin domain consolidation
- Remediate EAD attributes

Network

- Increase network bandwidth to accommodate increased use of cloud services

MS Office

- Enable use of Office Web Apps in shared tenant

SharePoint

- Upgrade on-prem SharePoint service to 2013
- Evaluate SharePoint Online features and impact of global settings in a shared environment
- Enable SharePoint Online in a shared tenant

Lync

- Implement Lync 2013 on-prem (IM, presence, desktop sharing, external web conferencing, mobility support)
- Enhance Lync 2013 on-prem (dial-in conferencing, federation, phone integration)
- Begin planning for full migration to O365 services

Exchange

- Complete detailed design for on-prem Exchange 2013 and Vault upgrades
- Prepare Exchange and Vault pre-prod environment: Procure HW/SW, configure, evaluate, revise design
- Migrate customers to Exchange 2013 on-prem
- Eliminate use of public folders
- Verify all business requirements are met by O365 services

Business Issues

- Identify and address related business issues – approach for O365 licensing, procurement, contracting, labor
